## PROFILE

Full-stack and AI engineer with hands-on, end-to-end experience building web applications, AI-powered automation systems, and SaaS products. Co-Founder and COO at Neofyx, an AI automation and SaaS startup in Karachi, where I lead product engineering and client delivery. First-year BS Computational Mathematics student at the University of Karachi, also enrolled in GIAIC's Full-Stack Development & AI / AI Agent Systems / Cloud & Web Development program (top 10% performer, Batch 1, 90-95th percentile across three quarters). Active open-source contributor with 70+ public repositories on GitHub. Comfortable scoping requirements, architecting solutions, and shipping working software independently across modern web and AI stacks.

## TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, HTML5, CSS3
- **Frontend:** React, Next.js (14, 16, App Router, ISR, Turbopack), Tailwind CSS, Framer Motion, shadcn/ui, Lucide icons, responsive design
- **Backend:** FastAPI, Node-based tooling, REST API design & integration, JWT authentication, OAuth 2.0
- **AI & Agentic Development:** OpenAI Agents SDK, Chainlit, Groq AI, Google Gemini, Claude, natural language processing, multi-agent/agentic systems, n8n workflow automation
- **Data, CMS & Auth:** Sanity CMS, Clerk
- **Cloud & Deployment:** Google Cloud Run, Containerization, CI/CD, Vercel, Hugging Face
- **Tools & Practices:** Git/GitHub, Docker, Docker Compose, Docker Hub, ESLint, ReportLab, code review, debugging across UI/API/DB layers, spec-driven development, prompt engineering, context engineering, database architecture, scalable system design

## EXPERIENCE

**Chief Operating Officer** | Neofyx — Self-employed *Dec 2025 – Present*

- Lead operations, technical execution, and product delivery; structure workflows and define technical direction so projects move efficiently from concept to deployment.
- Build full-stack features and AI-powered functionality end to end for client-facing applications.

**Frontend Development Intern** | CodeAlpha (Remote) *Sep 2024 (1 month)*

- Completed a one-month Frontend Development Virtual Internship (1-30 September 2024).
- Independently built and deployed three responsive web projects using HTML, CSS, and JavaScript: an Audio Player, a Calculator, and an Image Gallery.
- Applied core frontend concepts including DOM manipulation, responsive UI design, and interactive component building.

**Full-Stack Developer (Freelance / Project-Based)** | Independent *Ongoing*

- Built and deployed a personal portfolio website using React, TypeScript, Tailwind CSS, and Framer Motion.
- Designed and implemented an n8n automation workflow for AI-generated video content and multi-platform publishing (YouTube, TikTok), integrating Groq LLMs and the kie.ai Veo3 API.

## SELECTED PROJECTS

- **Kisaan Dost AI — Crop Disease Detector:** AI-powered crop disease detection tool for Pakistani farmers, built with Google Gemini Vision and deployed on Google Cloud Run, for Google AI Seekho 2026 (participated in Phase 1 and Phase 2). Won Silver Tier.
- **CIRO AI — Multi-Agent Crisis Response System:** Built with a team (Aadil Memon, Muskaan Fayyaz) for AI Seekho Phase 2, coordinating multiple AI agents to support crisis response workflows.
- **TaskSnap AI — Screenshot-to-Task Extractor:** AI tool that turns a screenshot of any conversation into a prioritized, deadline-aware task list. Built with Next.js 16, React 19, TypeScript, Tailwind CSS v4, Framer Motion, and Groq AI (with Gemini fallback) for "Chai aur Code," a monthly vibe-coding session by GDG Live Pakistan.
- **AURELIA — Luxury Fashion E-Commerce Platform:** Built for the Google Build with AI 2026 workshop (GeeksforGeeks); deployed on Google Cloud Run.
- **Personal AI Employee:** Agentic personal-automation system built for GIAIC Hackathon 0, using Obsidian for persistent memory, Python watcher scripts, and a CLI reasoning engine, with tiered Gmail, WhatsApp, LinkedIn, and social-posting automation (Bronze/Silver/Gold tiers).

- **Taskory — AI Full-Stack Task Manager:** Task manager with natural language processing, JWT authentication, real-time task management, and multi-AI-provider support (Python backend).
- **MORENT — Car Rental Marketplace:** Booking platform with smart filters, booking calendar, and interactive charts, built with Next.js, Sanity CMS, Clerk, and shadcn/ui (GIAIC Hackathon 2025).
- **AUI Blogo — Dev Blog Platform:** Production blog with Next.js 14 ISR, Sanity CMS, Tailwind CSS, dark mode, auto table-of-contents, and dynamic SEO, deployed on Vercel.
- **ChatAUI — Conversational AI Assistant:** Enterprise-style assistant built with Chainlit, the OpenAI Agents SDK, and OAuth 2.0 on a Python backend.
- **25 Python Projects:** A portfolio of 25 production-ready Python projects (socket games, computer vision, AI assistants, REST APIs, full-stack integrations) built for GIAIC.

## EDUCATION

**BS Computational Mathematics** | University of Karachi*In Progress*

**Certificate, Full-Stack Development & AI / AI Agent Systems / Cloud & Web Development** | Governor Sindh Initiative for GenAI, Web3, and Metaverse (GIAIC)*Feb 2024 – Sep 2026*

- Selected participant in a competitive, government-backed AI and cloud program (Batch 1); top 10% performer, maintaining 90-95th percentile across three quarters.
- Program covers full-stack web development (Next.js, React, TypeScript, FastAPI), database architecture, authentication, scalable system design, AI integrations, agent-based workflows, spec-driven development, and context engineering.

**Intermediate, Pre-Engineering** | Aisha Bawany Government College*Aug 2022 – Aug 2024*

- Grade A. Focused on Mathematics, Physics, and Chemistry, preparing for higher education in IT, engineering, and software development.

**SSC, Science** | Sadiq Public Primary & Secondary School*May 2020 – May 2022*

- Grade A1.

## ACHIEVEMENTS

- Silver Tier Winner, Google AI Seekho 2026 — for Kisaan Dost AI.
- Startup Challenge Winner — Neofyx won a startup challenge competition.
